I am a Senior/Lead Software Engineer with more than 10 years of experience and a backend and full stack focus. For the past few years I've worked mostly at startups so I am used to wearing many hats. I care deeply about building elegant and maintainable solutions, while keeping a great user and developer experience in mind.

SKILLS

Backend

Python   TypeScript

PostgreSQL   MySQL   Node

Bash

Frontend

HTML   JavaScript / TypeScript

CSS   React   Redux   Vue

Devops

Docker

AWS (EC2, ECS, SNS, Lambda etc)

GCP (GAE, GCE, Cloud Tasks, etc)

Jenkins

Other

Linux   Git   Unity   OpenGL

WORK EXPERIENCE (5)

Senior Backend/DevOps Engineer at Balena

Jan 2021 - Current

📍 **London/Remote, (EU)**

- Took ownership of existing built-in CI/CD system. I maintain and improve it while helping colleagues with any queries.

- Working on a team that builds a new CI/CD system to accomodate internal as well as customers' needs.

Senior Backend Engineer at Hopster

Jan 2020 - Dec 2020

📍 **London, (UK)**

- Responsible for the automated monthly delivery of content to partners. This involved a combination of GAE, GCE, Cloud Tasks, etc.

- Owned all server-mobile APIs. I was the point of contact for existing implementations as well as all new development in the area.

- Implemented integrations around user login flows (e.g. Apple Sign In).

- Facilitated team processes, worked towards enhancing developer experience and tackling technical debt.

Lead Software Engineer at We Got Pop

Dec 2015 - Dec 2019

📍 **London, (UK)**

- Implemented various features across the company's stack and products. Technologies mostly used were Python, JavaScript, React, PostgreSQL and AWS.

- Overviewed larger-scale projects, keeping track of progress and feeding back to product team.
- Line-managed two colleagues.
- Helped more junior members of the team with their everyday queries.
- Conducted interviews for development and product teams.
- Helped in shaping and organising some of the team's processes.

Software Engineer at IT2 Treasury Solutions
Sep 2013 - Nov 2015
 London, (UK)

- Implemented new functionality, enhancements and fixes, using C++, C, Microsoft SQL Server.
- Participated actively in meetings with product owners and managers during the planning process.
- Created a tool that unifies all developers' internal programs, making them easily accessible.
- Occasionally undertook team-leading responsibilities.

Software Engineer at Fidessa
Jan 2011 - Sep 2013
 Woking, (UK)

- Implemented a regression test framework for testing various products across the company. I was keeping track of new requests, resolving issues or assigning them to other team members.
- Ported a process (~8k lines) from Java to C++.
- Extended an existing web-based tool for testing market trading.

PROJECTS (1)

Bit Pong
https://github.com/stathismor/bit-pong
A mobile and web game, built in JavaScript.

EDUCATION (2)

MSc Computer Science at University of Piraeus
2007 - 2010
 Athens, (GR)
Grade: 9.4

BSc Economics at University of Athens
2001 - 2006
 Athens, (GR)
Grade: 6.5
